

Easy/ connect

Revolutionizing Event Networking with QR Technology

The Problem

The Challenges of Event Registration:

- On-spot registration often requires staff, computers, and printers.
- Manual data entry and badge printing can lead to long queues and delays.
- Guests often have to wait in line till their QR code badges gets printed.

The Solution

Meet EasyConnect

- A seamless QR solution designed for event networking.
- Pre-prepared QR code IDs that guests can personalize on their mobile phones.
- No need for on-spot registration staff, saving time and resources.

How It Works

How EasyConnect Works

- Guests receive a QR code ID at the event.
- At the event, they scan the QR code with their mobile phone.
- Guests register by putting their details directly on their phone, creating their event profile.
- Networking begins—guests can connect with other guests and booths instantly.

Steps To Use EasyConnect

- Scan the QR Code on the ID card.
- Register yourself with the required details and QR number present on the ID.
- Login with the name and QR number.
- After Successful login you are directed to the profile page.
- Access the dashboard via the right corner of the profile page.

- Organizers of private events who want a modern, hassle-free networking solution.
- Guests can easily grow their networks.

Business Man

Event Manager

Booth Owner

Unique Selling Points

Why EasyConnect?

- Eliminates the need for manual registration.
- Provides a modern, tech-savvy experience for guests.
- Easy to use, with no known competitors offering a similar solution.

Admin Dashboard

What insights can the dashboard offer?

- The dashboard provides the analytics guest interactions at your event, helping you identify influential guests, measure booth effectiveness, optimize network efficiency and much more.

The screenshot shows the 'easy connect' Admin Dashboard. It features a purple header with the logo. The main content area is titled 'Dashboard' and contains two primary sections:

- Total Connections:** Displays a count of '2' and a section for 'QR Numbers & Passwords' with a 'Manage Passwords' button.
- Guest Registrations:** A table listing guest information with a 'Download CSV' button below it.
